

Certificate of Conformance: Updated 1/18/2023

RoHS Compliance (Restriction of Hazardous Substances)
 (EU Directive 2002/95/EC)

Vanguard Research Industries (VRI) certifies that to the best of our knowledge that pure tin whisker mitigated finishes applied at VRI comply with the requirements of RoHS and RoHS-2 certification for pure tin plating.

The whisker mitigated process selected by VRI has been certified by a major connector OEM as conforming to RoHS Whisker Mitigated Deposit.

VRI also performs tin-lead alloy plating for certain customer part numbers which would not comply with the scope of RoHS certification for pure tin, whisker mitigated plating.

Additional information on RoHS Regulations may be obtained at the following websites.
